

## Our social security system is **UNDER ATTACK!**

In order to further cripple our social security system, the current (neo)liberal government is attempting to pass two Bills through Parliament. These Bills (the Welfare Reform Bill and Cashless Debit Card Bill) contain a raft of odious proposals, which will:

- unjustifiably extend and expand the discredited cashless welfare system
- significantly expand the dangerous Work for Dole forced labour program
- increase the waiting period for Newstart (effectively robbing applicants of \$540)
- increase financial penalties for the unemployed
- give private job agencies increased power to make and enforce compliance decisions, further eroding government oversight, and your right to review

These Bills represent one of the most serious attacks ever levelled at the unemployed.

If passed, the proposals contained within will place unemployed workers at the mercy of job agencies.

This legislation is an attack on our social security system, an attack on the unemployed. We need to take collective action.
